THE
DIFFERENCE
IS IN THE
DETAILS

HIGHER- QUALITY AND MORE DURABLE BATHROOM FURNITURE

We present a high-performance and differentiating board: SuperPan. A state-of-the-art board that opens up new possibilities for interior decoration.

SuperPan is synonymous with the guarantee of durability.

FIND OUT MORE

See all the videos that delve into the properties of this innovative board by scanning the QR code:

EXCELLENT SURFACE FINISH

In an environment as demanding as the bathroom, the use of the superPan board gives the fronts extra protection against changes in humidity and temperature.

SuperPan H (moisture resistant) has even better moisture resistance properties.

STURDY AND SOLID FURNITURE

SuperPan's composition, and especially the higher density of its outer layer, makes for more robust furniture, especially in the case of heavy furniture hanging from the walls.

HIGHER RESISTANCE TO EVERYDAY IMPACTS

Furniture made with SuperPan benefits from its resistance to small everyday impacts, such as those caused by small objects falling.

PERFECT AND DURABLE EDGES

SuperPan allows for a better finish on edges, in addition to giving the cabinet extra protection against everyday impacts that occur when using and cleaning the bathroom.

HIGH PERFORMANCE IN BATHROOM FURNITURE

SuperPan's potential stems from how it behaves in different industrial processes, always striving for an excellent relationship between its cost and the value it offers users.

PERFECT CUTTING AND MACHINING

SuperPan's composition considerably reduces chipping in melamine coatings, making for high-quality edging, even with visible cuts, improving precision and the perceived quality of the furniture. In addition, it allows cutting more linear metres without sharpening the tool.

GREAT SUITABILITY FOR FASTENERS

Drill holes have great stability, allowing for highly resistant assemblies using dowels, screws, eccentric fasteners or hinges. This resistance is transmitted to the different assemblies, such as shelves and backs.

SUITABLE FOR LACQUERS AND OTHER DEMANDING COATINGS

Both for lacquered furniture and film coatings (PET, Finishfoil, HPL, etc.), SuperPan provides long-lasting surface flatness and stability.
