KITCHENS

superPan

THE
DIFFERENCE
IS IN THE
DETAILS

SHELVES WITH HIGHER LOAD CAPACITY

Thanks to its excellent technical properties, shelves made with SuperPan can withstand more weight without sagging, which is especially useful for crockery cabinets and pantries.

EXCELLENT SURFACE FINISH

SuperPan is designed for higher resistance to changes in humidity and temperature without affecting its surface, so, with the right coating, it is ideal for keeping your cabinet fronts and surfaces looking as good as on the first day.

HIGHER-QUALITY AND MORE DURABLE KITCHEN FURNITURE

We present a high-performance and differentiating board: SuperPan. A state-of-the-art board that opens up new possibilities for interior decoration.

SuperPan is synonymous with the guarantee of durability.

DURABLE SURFACES

Outer faces offer high resistance to impacts, thus minimising damage caused by objects falling on horizontal surfaces.

SuperPan Plus Decor has passed the test for general use in kitchens according to UNE 56875:14 V2.

STRONGER EDGES

Edges, especially mitred ones, are more resistant thanks to the external MDF layer. It offers greater protection against the small bumps that occur in everyday use.

HIGH PERFORMANCE IN KITCHEN MANUFACTURING

SuperPan's potential stems from how it behaves in different industrial processes, always striving for an excellent relationship between its cost and the value it offers users.

PERFECT CUTTING AND MACHINING

SuperPan's composition considerably reduces chipping in melamine coatings, making for high-quality edging, even with visible cuts, improving precision and the perceived quality of the furniture. In addition, it allows cutting more linear metres without sharpening the tool.

GREAT SUITABILITY FOR FASTENERS

Drill holes have great stability, allowing for highly resistant assemblies using dowels, screws, eccentric fasteners or hinges. This resistance is transmitted to the different assemblies, such as shelves and backs.

SUITABLE FOR DEMANDING COATINGS

Both for lacquered furniture and film coatings (PET, Finishfoil, HPL, etc.), SuperPan provides long-lasting surface flatness and stability.

PERFECT WORK FINISHINGS

With Superpan, finishings and small adjustments to your work are always perfect, even using portable tools.
