THE
DIFFERENCE
IS IN THE
DETAILS

THE IDEAL PRODUCT FOR THE INTENSIVE USE OF THE OFFICE

We present a high performance and differentiating board: SuperPan. A state-of-the-art board that opens up new possibilities for interior decoration.

SuperPan is synonymous with the guarantee of durability.

FIND OUT MORE

EXCELLENT SURFACE FINISH

With the passage of time and changes in temperature and humidity, some coated surfaces gradually lose their flatness and their original appearance. SuperPan is designed to keep surfaces looking as good as they did on the very first day.

RESISTANT WORK SURFACES

A work table must be designed for a carefree use. SuperPan is designed to better withstand impacts and extend the product's life.

SHELVES WITH HIGH LOAD-BEARING CAPACITY

For an environment as demanding as a work space, shelves made with SuperPan can withstand high loads with minimum deflection.

HIGH-QUALITY JOINTS

SuperPan's external surface is made with high-density wood fibres, which makes for very precise and resistant mitre joints.

MAXIMUM PERFORMANCE IN THE MANUFACTURING OF OFFICE FURNITURE

SuperPan's potential stems from how it behaves in different industrial processes, always striving for an excellent relationship between its cost and the value it offers users.

PERFECT CUTTING AND MACHINING

SuperPan's composition considerably reduces chipping in melamine coatings, making for high-quality edging, even with visible cuts, improving precision and the perceived quality of the furniture. In addition, it allows cutting more linear metres without sharpening the tool.

GREAT SUITABILITY FOR FASTENERS

Drill holes have great stability, allowing for highly resistant assemblies using dowels, screws, eccentric fasteners or hinges. This resistance is transmitted to the different assemblies, such as shelves and backs.

SUITABLE FOR DEMANDING COATINGS

Both for lacquered furniture and film coatings (PET, Finishfoil, HPL, etc.), SuperPan provides long-lasting surface flatness and stability.
